

For Immediate Release

## Using HSAs For A1c and all Smart Health Reports™ Just Got Easier

*MyHealthResults.com by Acumen BioLogics, Inc. is now an approved vendor for Health Savings Accounts (HSA) credit cards for all blood tests and Smart Health Reports™.*

**Salt Lake City, UT---August 22, 2008** – Acumen BioLogics, a Utah-based biotech company today announces the acceptance of Health Savings Accounts (HSA) credit cards on [www.myhealthresults.com](http://www.myhealthresults.com). My Health Results is a secure web site empowering people with affordable blood chemistry tests and online Smart Health Reports™. These secure online reports provide consumers easy-to-understand results and educational information while addressing the urgent need to bring ‘health’ back into healthcare.

COO of Acumen BioLogics, Tim O’Brien said, “Accepting Health Savings Accounts credit cards enables our customers to decrease their out of pocket expenses for laboratory testing and as a value added bonus receive education and online tracking of their progress. It is our company goal to provide affordable access, education, and empowerment to our customers to take charge of their health.”

With Health Savings Accounts, diabetics, people with high cholesterol, and/or those with a family history of either can now more affordably purchase needed tests and be in charge of their health with pre-tax accounts. A1c tests are needed a minimum of 4 and a maximum of 6 times a year for the average diabetic. With co-pays and office visits many diabetics are paying out of pocket \$45 for each test and cannot use their Health Savings Accounts (HSA.) and save \$20 a test or more at [www.myhealthresults.com](http://www.myhealthresults.com).

Insurance companies and corporate wellness plans are begging people to take an active role in their health and reduce costs. If people do not understand their lab results, how can they make diet and lifestyle changes to prevent disease? MyHealthResults.com by Acumen BioLogics provides the tool to do just that, with easy- to-understand results and educational information to empower people in their health. We believe - *It’s Your Health – You Should Know!*™
