## The # 1 Way to Prevent Disease Is Through Inexpensive Blood Screenings

*Acumen BioLogics, Inc. Launches Direct To Consumer Blood Chemistry Testing and On-Line Easy-to- Understand Results and Educational Reports with [www.myhealthresults.com](http://www.myhealthresults.com)*

**Salt Lake City, UT----May 2, 2008** – Acumen BioLogics, a Utah –based biotech company today launched [www.myhealthresults.com](http://www.myhealthresults.com) . My Health Results is a secure web site providing consumers the opportunity to be in charge of their health through affordable blood chemistry screenings and on-line Smart Health Reports™ that provide easy-to-understand results and educational information. My Health Results addresses the urgent need to bring ‘health’ back into healthcare.

Many diseases can be prevented with early detection like type 2 diabetes. According to Dr. Todd Cameron, ND, “the on-set of type 2 diabetes can be delayed and/or prevented with early detection through affordable blood testing and changes in diet and lifestyle.” My Health Results offers important screenings from an A1C test for long term sugar control and diabetes testing, all the way to screenings and tests for heart disease, general wellness, and anti-aging hormone profiles all with the valuable educational report. Detection – blood screening – and prevention – education – are the foundation of myhealthresults.com.

Healthcare reform is a major concern locally and nationally. The number of companies in Utah that offer health insurance to their employees has dropped 8.8 percent in four years. The double digit increases in the cost of insurance, 21.5 percent in Utah, have made it prohibitive for some small businesses to provide health insurance coverage to employees. 47 million Americans, 287,200 in Utah, have no health insurance and do not have access to affordable blood testing and educational information to actively manage their health. Even with healthcare insurance, many families with autism and fibromyalgia are paying out of pocket thousands of dollars for needed basic tests not covered by their insurance.

CEO of Acumen BioLogics, Melinda O’Brien said, “My Health Results provides affordable blood testing and educational reports to consumers as a solution for the current healthcare situation in the U.S. by providing access to anyone interested in improving their health or paying high out- of- pocket prices for blood testing. Insurance companies and corporate wellness plans are begging people to take an active role in their health to reduce costs. If people do not understand their lab results, how can they make diet and lifestyle changes to prevent disease? We provide the tool to do just that with easy– to-understand results and education information for consumers in one web site. We believe - *It’s Your Health – You Should Know!*”

As the national debate rages on, politicians are reviewing the cost of care, access to insurance and quality; prevention is still missing in the analysis. It is much more cost effective to prevent disease than to manage or cure disease. Diabetes costs an average of \$6,400 per year in healthcare costs; an A1C screening through myhealthresults.com costs \$25 and comes with an online educational report so consumers can make informed decisions about their health, diet and lifestyle. Many experts have agreed that the number one way to reduce health care cost is to reduce the ‘cost of health’ in the long-term through empowering people with health education. Detection – blood screening – and prevention – education – are the foundation of myhealthresults.com. The private sector is beginning to bring solutions to the market to do just this. Myhealthresults.com is one of these companies. Detection – blood screening – and prevention – education – are the foundation of myhealthresults.com.

### About Acumen BioLogics, Inc.

Acumen BioLogics is a web-based health analytics company that provides certified national laboratory testing, analysis, education, reporting, and scientific evidence to integrative licensed Medical Doctors, Naturopathic Doctors, Osteopathic Doctors, Chiropractic Doctors, Nurse Practitioners, Pharmacists, Clinical Nutritionists, and Integrative Health Clinics.
